

THE OHIO STATE UNIVERSITY

BYRD POLAR AND CLIMATE
RESEARCH CENTER

Support the Ice Core Expansion Campaign

Dr. Lonnie Thompson and Dr. Ellen Mosley-Thompson at the Ice Core Storage Facility in Columbus, Ohio, at The Ohio State University.

"We are in a salvage mission mode - to get into these remote parts of the world, capture those histories, and get those histories stored in a safe place."

~Dr. Lonnie Thompson

Ice cores give us our best glimpses of Earth's climate history and allow us to better project our climate future.

Because glaciers around the world are rapidly melting, humanity runs the risk of losing these unique archives.

**Donate to the *BPCRC Ice Core Facilities Renovation Fund* at:
byrd.osu.edu/ice**

Every year we delay the project means that more and more critical climate records will not be available to us in the future.

THE OHIO STATE UNIVERSITY

BYRD POLAR AND CLIMATE
RESEARCH CENTER

Support the Ice Core Expansion Campaign

The Ohio State University's Ice Core Facility contains the last remnants of many of the world's vanishing glaciers.

Students working with data from ice cores collected by Byrd Polar scientists.

"A lot of the questions that we haven't even asked can only be answered by having an archive of Earth's history available to the next generation."

~Dr. Lonnie Thompson

The Ice Core Research Expansion will:

- **Increase Ice Core Storage Capacity**
- **Promote Sustainability**
- **Inspire the Next Generation of Scientists**
